DISTRICT PROGRAMS

District 4R is host to several programs unique to our district in the region. We have a contract with the Kansas City Community Center for residential facility services. We contract for 109 beds in the facility, where clients receive case management services, shelter, meals and job counseling. While there, clients develop home plans to live independently. In addition to KCCC, we supervise the TREND program, which is a specially designed program for clients who have never been to prison, but who score high need or high risk on our client analysis scale. In addition to the services provided in a traditional residential facility, (see above), clients are provided substance abuse treatment, GED services, individual counseling and individualized treatment services based on a thorough assessment of needs. Our Alt-Care program is an intensive outpatient substance abuse program for females. Alt-Care provides from four to thirty-five hours of treatment per week, with individual and group counseling, case management services, a registered nurse on staff at all times, educational and child care services, as well as access to inpatient treatment if necessary and housing assistance.

COMMUNITY RESOURCES

We have a variety of resources we use in 4R, from substance abuse to education. We are located in the Crossroads section of Kansas City, and are on the southern edge of Downtown. We use outpatient services, that is treatment programs that clients attend once or more per week, but still reside in their own home. We also use inpatient services when necessary, which as the name implies is treatment in which the client stays at the treatment facility. We work with a vast array of resources as we try to match them to the need of the client. Some of these resources are funded with state or county funds, while most are private, self-pay programs.
